## SINOPIA

[Help and Resources](#)

The screenshot shows the Sinopia web interface. On the left, under 'Latest news', it announces 'Sinopia Version 3.7.1 highlights' and provides a link to the help site. A bulleted list details new features like a recent records dashboard, improved lookups, and template enhancements. On the right, the 'Login to the Linked Data Editor' section contains input fields for 'User name' and 'Password', a 'Login' button, and links for 'Forgot Password' and 'Request Account'. The background of the interface features a faint, artistic sketch of a person's face and architectural elements.

**Latest news**

**Sinopia Version 3.7.1 highlights**

*For complete release notes see the [Sinopia help site](#).*

- Dashboard includes records user worked on recently
- Lookup enhancements: faster lookups; ability to page more results; ability to use diacritics in search string; result counts; dropdown lists sorted
- Template creation enhancements: when nesting a template, choose from menu of existing templates; when adding lookups, choose from menu of available lookups

The underdrawing for the new world of linked data in libraries

# What is Closing the Loop?

# What are our Partners?

- LD4P Partners
- Program for Cooperative Cataloging
- SHARE-VDE
- Library of Congress
- OCLC

# What are the Questions?

- Should there be a standard form of BIBFRAME?
- Should we exchange data or link to data?
- Should data recorded as BIBFRAME and MARC be kept in sync?
- Should library recorded in BIBFRAME be free and open?
