

# DCMI RDA Task Group (1)

- Charter: To define components of the draft standard "RDA - Resource Description and Access" as an RDF vocabulary for use in developing a Dublin Core application profile.
- Progress: Most RDA element sets and vocabularies have been registered
  - <http://metadataregistry.org/rdabrowse.htm>
  - Article about process is being prepared
- Issues: delays with RDA; relating FRBR to RDA; aggregated RDA statements

# DCMI RDA Task Group (2)

- Future activity:
  - Finalise registration using definitive version of RDA
  - Non-English language versions (German started)
  - Work on application profile(s)
  - Liaise with Vocabulary Mapping Framework
    - <http://cdlr.strath.ac.uk/VMF/>
  - Liaise with registration of IFLA element sets and vocabularies
    - FRBR expected before the end of 2009

# Vocabulary Mapping Framework

- Funded by UK's Joint Information Systems Committee (JISC), June-November 2009
  - <http://cdlr.strath.ac.uk/vmf/>
- Extending the RDA/ONIX framework for resource categorization
  - Content and carrier types + Resource/agent relators
  - Hub-spoke mappings to underlying ontology
  - All expressed in RDF
- 9 Nov 2009: Seminar, British Library, London
  - See website for details

# FRBR and IFLA standards

- IFLA discussing namespaces for all IFLA standards
  - FRBR/FRAD, ISBD, UNIMARC
- FRBR namespace now likely by end of 2009
  - Base domain established
- ISBD Review Group has XML Task Group
  - RDF/XML
- FRBR Review Group will consolidate FR family
  - FRBR(er), FRBR(oo), FRAD, FRSAD
