

# Library Linked Data XG

Kai Eckert, Mannheim University Library  
Alexander Haffner, German National Library

DCMI Library Community Meeting  
October 21<sup>st</sup>, 2010

# LLD XG Overview

- 48 participants
- 21 organizations
- <http://www.w3.org/2005/Incubator/llid/>
- Chairs:
  - Tom Baker
  - Emmanuelle Bermes
  - Antoine Isaac
- Started: 21 May 2010
- Projected duration: 1 year

# Charter

- Help increase global interoperability of library data,
  - bringing together people involved in Linked Data activities,
  - building on existing initiatives and
  - identifying collaboration tracks for the future.
- 
- Explore existing building blocks of librarianship and state of the art:
    - metadata models, metadata schemas
    - standards and protocols for building interoperability and
    - library systems and networked environments.
- 
- Librarians as potential major provider of authoritative datasets (persons, topics...) for the Linked Data Web.
  - Identify needs for standardization and guidelines

# Deliverables

- Use-case document
  - real-world use cases
  - case studies
- Technology Report
  - Vocabularies and ontologies (e.g., SKOS)
  - Extension or interoperability requirements
  - Missing standards
- Final report
  - Linked data developments in the library domain and related sectors
  - Represent the library requirements for further W3C standardization actions

# Status and next steps

- Gathering of use-cases completed
  - 42 use cases
- This weekend LLD F2F meeting and workshop
  - discussion and curation of use-cases
  - Identification of LLD vocabularies
  - Derivation of LLD requirements
  - Refinement of deliverables
